Chemicals

Hot Tub Products Chemicals are Made in the USA
We have supplied Chemicals to the Industry since 1999.

HT Chemicals include the highest concentrates available in the industry and maintain a high level of consistency in the production process. These qualities help you minimize the volume of chemicals required and assure you that the amount needed won't change with each order you receive.

HT Chemicals have NEVER been available through Mass Merchants or Large Online Companies. To meet their pricing needs these companies often require the need to dilute liquid chemicals and add fillers to granular products. We pride ourselves in standing firm on quality and remain committed to the distribution of our chemicals only through local hot tub dealer and service organizations.

Chemical Starter Kits

Bromine Kit

Bromine Kit Includes:

- 1.5 lb. Bromine Tablets
- 1 Pint Stain & Scale
- 1 lb. pH & Alkalinity Up
- Floating Dispenser
- 1.5 lb. pH & Alkalinity Down
- 4-in-1 Test Strips
- 2oz Packet Bromo Boost
- Measuring Cup

Part #: CHK100 Case(6)

Each Kit Includes:

Caring for Your Hot Tub Guide
A multi-page brochure on proper use of chemicals along with a trouble shooting guide.

Chlorine Kit

Chlorine Kit Includes:

- 1 lb. Chlorine Granules
- 1 Pint Stain & Scale
- 1 lb. pH & Alkalinity Up
- 1.5 lb. pH & Alkalinity Down
- 4-in-1 Test Strips
- Measuring Cup

Part #: CHK100 Case(6)

Sanitizers

CHOOSING BETWEEN CHLORINE & BROMINE

The **BENEFIT TO CHLORINE** is that it begins sanitizing and reaches a proper ppm reading almost immediately. The downsides to Chlorine are you need to add a little every other day to maintain a proper ppm level or it will give off a scent. It also is not as effective as Bromine in high water temperatures making it more preferred for swimming pools. It's also not recommended in the high pH range, compelling you to keep your pH level between 6.8 and 7.0.

The **BENEFITS TO BROMINE TABLETS** is that it requires less maintenance allowing you to go up 1 to 2 weeks without adding more tablets. It works well in high water temperatures and is also effective over a wider pH range, so if your pH fluctuates your sanitizer is still working. The downside to bromine tablets is that they are slow dissolving and take several days to begin sanitizing. For immediate activation you must add both Brom Bank and Spa Activator.

Chlorine

Chlorine Granules

Sanitizing with Chlorine

Add ½ teaspoon of HT Chlorine Granules for every 100 gallons of water and maintain a chlorine level between 3 to 5 ppm. Depending on usage you should be adding chlorine approximately every other day. These levels can be reduced to 1 to 3 ppm with the use of a Mineral Purifier. For best results add 2 ounces (3 oz if there were 3 or more bathers) of Spa Activator each time after using your hot tub.

2 lb. Part #: CHSE101 Case(12)

1 lb. Part #: CHSE201 Case(12)

USE WITH WITH ALL SANITIZERS

Oxy Shock

The powerful oxygen-based oxidizer provides 2 benefits when used in conjunction with spa water sanitized by Chlorine. It helps eliminate contaminants introduced by bathers along with environmental factors like wind and rain. It also helps restore sparkle and clarity to the water without affecting hardness or stabilizer levels. Recommend using 1 ounce per every 100 gallons (3 oz in a 300-gallon spa)

2. lb. Part #: CHSE119
Case(12)

Bromine

Bromine Tabs

Bromine Tablets provide carefree sanitation for up to 1 to 2 weeks depending on usage and the number of gallons in the spa. Place 1 Tablet per every 100 gallons (3 Tablets for a 300-gallon spa). Bromine levels should be kept between 3 to 5 ppm which can be reduced 1 to 3 ppm with the use of our HT Mineral Stick. Tablets are slow activating and take up to 1 to 2 weeks to reach a proper reading.

1.5 lb. Part #: CHSE103
Case(12)

Floating Bromine Dispenser

Depending upon frequency of spa usage and the number of gallons in the spa set your valve between half to fully open. There is no harm in leaving the dispenser in the water during usage.

Part #: ACSP101

Spa Activator

Spa Activator is an odorless shock that is the most favored product by hot tub owners whether they use chlorine or bromine. It is a powerful oxidizer formulated to be safe to use after each use of the hot tub whether you are using chlorine, bromine, or mineral purifiers.

2.2 lb. Part #: CHSE104
Case(12)
1 lb. Part #: CHSE204
Case(12)

2 Ways to Quickly Activate Bromine Tablets

Brom Bank

Brom Bank consists of Sodium Bromide and other inert ingredients that allow you to sanitize your spa when used in conjunction with HT Spa Activator. On its own it provides no sanitizing benefit.

1 Quart. Part #: CHSE102
Case(12)

To quickly activate the Bromine Tablets, for every 300 gallons of water simply add either 2 ounces of Brom Bank or our 2oz Packet of Bromo Boost, turn on jet pumps, and then add 2 ounces of Spa Activator. This should help you reach a bromine level in about 15 minutes. Ideal to do when you start up your spa and whenever you forget to add Bromine Tablets which will drop your bromine level to zero.

Bromo Boost

This 2 oz packet contains 99% of Sodium Bromide in a granular state that is very effective in raising your bromine level when used in conjunction with Spa Activator. On its own it provides no sanitizing benefit.

Part #: CHSE202

Balancing Your Water

Your pH should be kept between 7.2 – 7.8, the ideal alkalinity level is between 80-150 ppm, and calcium hardness should stay within 150 - 250 ppm for spas and 200 – 400 for pools.

pH/Alkalinity Up

Raising Ph/Alkalinity

- For every 500 gallons of spa water
 - If pH is between 6.8 – 7.2
1 oz of HT pH/Alkalinity Up
 - If pH is less than 6.8 add 2 oz.
- Allow filtration pump to run for 1 to 3 hours, retest and repeat Step 1 if necessary.

For best results dissolve in bucket of spa water then pour into spa.

2 lb. Part #: CHSE105 Case(12)

1 lb. Part #: CHSE205 Case(12)

pH/Alkalinity Down

Lowering Ph/Alkalinity

If pH is above 7.8 refrain from entering your spa and perform the following instructions:

- For every 500 gallons of spa water add ½ oz of HT pH/Alkalinity Down
- Allow filtration pumps to run for 30 minutes, retest and repeat Step 1 if necessary.

If pH is in line but Alkalinity is not run all spa pumps on high speed for 15 minutes. For best results dissolve in bucket of spa water then pour into spa.

1.5 lb. Part #: CHSE106 Case(12)

Liquid Calcium

Raising Calcium/Hardness

To raise the Hardness level of your water just 45 ppm higher add 3 oz of Liquid Calcium for every 300 gallons (in a 1200-gallon swim spa add 12 ounces). Allow filtration pump to run for 30 minutes and then retest and add more if necessary.

NOTE: In hot water you can only add 3 oz every 30 minutes but in cold water you can add up to 12 oz. Wait at least one hour, retest and add more if necessary.

RECOMMENDATION: Sanitizer Test Strips provide a hardness reading but for those that need to raise their Calcium level we recommend using Hardness Test Strips more accurate results.

1 Quart. Part #: CHSE111 Case(12)

pH Hold & H₂O Softener

Very Ease to Market this 2 in 1 Product. Perfect for those that often need to adjust their pH & Alkalinity levels. Simply adjust your pH and Alkalinity once pour it in and your levels will remain constant until you drain the water. It also softens the water which is ideal for those with dry skin. Softening the water reduces the itchy feeling some bathers feel when exiting their spa, along with minimizing eye irritation and helping to prevent corrosion to your spa components.

1.65 lb. Part #: CHSE111 Case(12)

Test Strips

Hardness Test Strips

Tests both low & high range hardness levels. Tests both calcium and magnesium, the 2 primary minerals that affect hardness levels. Recommended for those with Low Hardness levels.

25 Pk

Part #: TSAC103
Case(12)

TDS Test Strips

Tells you when to drain your hot tub, saving you time & money! Total Dissolved Solids is the measure all dissolve chemical in your water. A high TDS level prevents makes it difficult to balance your water and prevents sanitizer effectiveness, the primary reason to drain your water.

25 Pk

Part #: TSAC104
Case(12)

Bromine & Chlorine Test Strips

4 in 1 Tests:

- Chlorine & Bromine
- pH Level
- Alkalinity Level
- Hardness Level

Blister Pack - 50 Pk
Part #: TSLM108
Case(12)

Bottle Only - 50 Pk
Part #: TSLM109
Case(100)

Salt Test

Measures the Sodium Chloride level from 1500 to 5000 ppm. Essential for those using salt water sanitation systems in their hot tub.

10 Pk

Part #: TSLM111
Case(12)

Water Maintenance

Stain & Scale

A high concentrate product for prohibiting the scaling and calcium build up on component parts and acrylic surfaces.

1 Pint. Part #: CHSE108
Case(12)

Protection Plus

A dual solution concentrate of both stain and scale prevention and a water clarity formula for reducing organic containments.

1 Quart. Part #: CHSE107
Case(12)

Natural & Clear

Natural & Clear is a natural enzyme that biodegrades organics (body oils, lotions, etc.) as soon as they enter your spa. It helps prevent common water scum lines and keeps your water crystal clear.

Add 2 oz. Weekly

1 Quart. Part #: CHSE109
Case(12)

Foam Away

Instantly eliminates foaming! Our high concentrate HT formula of active ingredients requires so little in to be effective that it can be used with a spray applicator targeting only the foaming areas.

Apply only when needed

1 Quart. Part #: CHSE110
Case(12)

Sun Sorb

This smiling sponge absorbs body oils, hairspray, etc. as it floats in your spa. It works extremely well and is reusable.

2 Pk - Part #: ACSP125

Jet Line Cleaner

Perfect Product to Use Before You Drain Your Spa

During non-use bacteria accumulates within the plumbing lines. This affects water chemistry and can cause harm to spa components. HT Jet Line Cleaner is highly effective in dissolving bacteria along with cleaning your jet fittings that discolor over time.

Great for Jetted Bathtubs Too!

This is not a good idea; it is a must for anyone who owns a jetted bathtub.

All the plumbing lines sit dormant after each use collecting bacteria. It's one of the primary reasons why Kohler virtually discontinued all jet fittings in bathtubs.

1 Pt. Part #: CHSE116
Case(12)

Spa Booster Seat

This Comfortable and attractive design features heavy duty, heat resistant material and suction cups to prevent the seat from floating or moving. The firmness and size can be adjusted by the amount of water used to fill it. Easy filled with a standard garden hose. Dimensions: 15" x 13" x 4" when filled.

Part #: ACSP124

Spa Maintenance

All Purpose Cleaner

This unique enzyme based solution can be used to spray and clean the acrylic surface above the water line when the spa is filled without affecting the water's chemistry. It's also perfect for cleaning the acrylic shell when spa is drained. This could easily become your favorite household cleaner; perfect for hard water stains on sinks, eliminates mold and mildew without bleaching surface.

1 Quart. Part #: CHSE112
Case(12)

Cover Conditioner

Protect and extend the life of your cover. This silicon based product helps protect all forms of vinyl and leather from hardening and cracking and includes a UV inhibitor to protect cover from the harsh ultraviolet rays of the sun. Also leaves the cover with a high sheen. Apply with cloth towel and wait 10 minutes before wiping off. We recommended using Cover Conditioner monthly if cover is located in direct sun and 4 times a year if not.

PERFECT FOR: Cars, Boats, Outdoor Furniture, Saddles, You Name it!

1 Pint. Part #: CHSE117
Case(12)

Ultra Mitt

Amazing product is great for acrylic spas, boats, tiled showers, bathtub, patio furniture, and the list goes on!

Part #: ACSP102

Cover Wipes

Designed for all forms of cleaning but especially formulated for hot tubs since it brings no adverse effect to your water chemistry. Ideal for weekly and monthly cleaning of spa cover, acrylic coping, pillows, and even the exterior cabinet.

40 Pk - Part #: ACSP104
Case(12)

Bromo Boost

2 oz. Packets of Sodium Bromide

One 2 oz packet of Bromo Boost used in conjunction with 2 oz of HT Spa Activator will instantly provide a Bromine Sanitizer Residual.

Container Contains 12 2 Oz. Packets of Sodium Bromide

Part #: CHSE202
Unit 2oz Case(12)

Mineral Purifier Stick

Includes Zinc, Silver, & Copper Micron Beads. Compatible with Chlorine, Bromine, & Salt Systems. Simply drop the HT Mineral Stick into your filter cartridge, basket, or skimmer and replace it every 4 months.

Part #: CHSE200 Case(25)

Fun Thermometers

Adds Safety and Fun to Spas & Pools. Your Choice, Duck or Shark Accurately reads both air and water Temp.

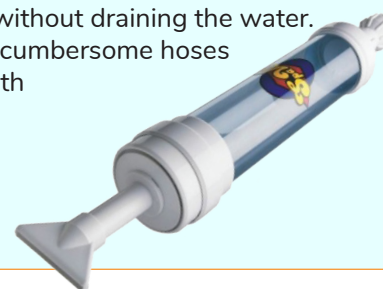

Duck - Part #: ACSP116

Shark - Part #: ACSP117

Paradise Spa Vac

This simple pump action spa vacuum is great for cleaning small debris that builds up at the bottom of your hot tub or pool without draining the water. Eliminates the need for cumbersome hoses and comes complete with brush attachments.

Part #: ACSP108

Filter Maintenance

Filter Cartridges protect your spa components along with keeping your water clean and healthy. Proper cleaning can double the life of your filter.

Filter Cleaner

Deep soaked cleaning each time you change your water. Extends the life of your filter. Add 8 oz. of solution for every 1.25 gallon of water and allow cartridges to fully soak for 8 to 10 hours. Remove and rinse thoroughly then allow cartridges to fully air dry before reinstalling into the spa. Having a spare filter will extend the life of both filters.

1 Quart. Part #: CHSE114
Case(12)

Instant Cartridge Cleaner

Depending upon spa usage filters should be cleaned every 1 to 3 weeks. A water hose will remove large debris but to eliminate non-visible grime and oils requires a Cartridge Cleaning solution. To use, remove your filter cartridge, spray on Filter Cleaner, wait at least 10 minutes and simply hose it off your filter cartridge.

1 Quart. Part #: CHSE115
Case(12)

Your Choice of Filter Cleaners

Cleans Easier, Better & SAVES 50% on Time & Water

NucLeaner Cartridge Cleaner

This trigger controlled unit will reduce filter cleaning time and ensure a much cleaner filter, removing more dirt, debris and grease than traditional cleaning devices.

Part #: ACFL105

Filter Flosser

Up to 17 spray streams provide a powerful spray cleaning action. Allows you to control the pressure of your spray so you can use it also for power washing cabinet, steps, and even walkways.

Part #: ACFL106

Filter Cover

Reduces frequency of cleaning your filter cartridge. Protects your pump and skimmer basket from debris and helps improve water quality.

Part #: ACFL126

Sediment Pre-Filter

Perfect Way to Fill Your Spa Can Be used For 4 Water Refills
Eliminate metals and other contaminants before they enter your spa. Filling with clean water reduces the chemicals your spa requires. Simply attaches to your garden hose.

Part #: CHSE300
Case(12)

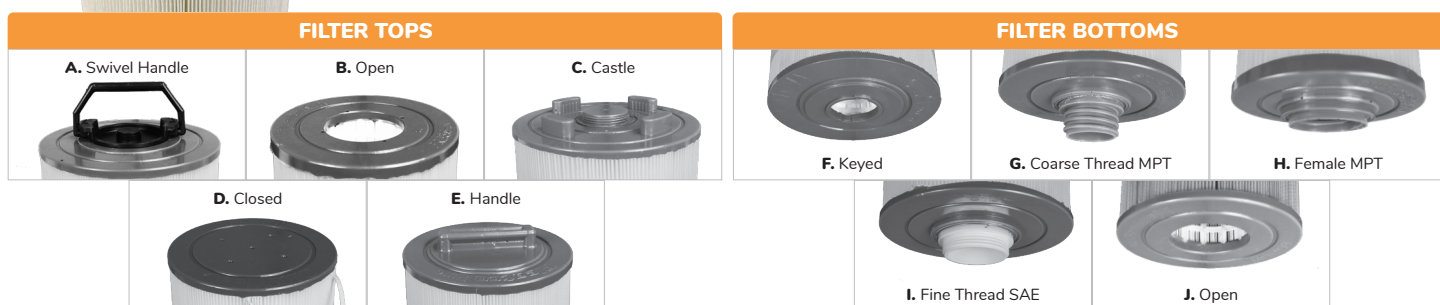

Filters

ENGINEERED FOR
MAXIMUM EFFICIENCY

- END CAP:** ABS Molded End Caps that inhibit growth of bacteria and are resistant to chlorine and bromine use.
- CORE:** Designed to maximize water flow which extends filter life and reduces wear and tear on your pump.
- MEDIA:** This unique design captures minute particles and allows full water flow saving you time and money.
- BAND:** A tightly secured band is standard on tall filters to help protect the pleats and maximize the filter area.

SpaEase™ 100

#1 Cover Lifter Design Sold

Popular because it is **SIMPLE TO INSTALL**, and the angular design with our full-length center bar makes it **EASY TO OPERATE!**

The SpaEase 100 also includes a padded handle and an additional Free Attachment for hanging multiple towels and robes.

- Requires 10 to 15" of rear clearance
- Requires 5" of clearance from each side
- Fits most hot tubs up to 96"
- 5 Year Limited Warranty

Product	Model	Pallet Qty
SpaEase 100	LFSE100	94

SpaEase™ 150

Prevents Harm to Your Cabinet

The SpaEase 150 Lifter eliminates the need to install any screws! The unique addition of our steel plate supports the lifter with the weight of your spa.

The cover easily slides behind the cabinet so that your view is not impaired while the angular design protects the cover by keeping it off the ground when in the open position.

- Requires as little as 18" of clearance at rear
- Requires 4" of clearance from each side
- Fits most hot tubs up to 96"
- 5 Year Limited Warranty

Product	Model	Pallet Qty
SpaEase 150	LFSE150	44

SpaEase™ 175

Fits Virtually Every Cover Shape

Installs on square, octagonal and even round spas along with those with a large radius corner design.

Our under-mount base plate makes installation easy, and a powerful center gas shock makes removing and replacing your spa cover effortless.

When not in use it easily folds and hides behind your spa.

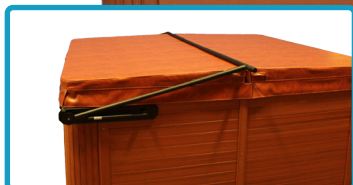

- Requires as little as 18" of clearance at rear
- Requires no clearance from either side
- Works with spas from 30" to 40" tall
- 5 Year Limited Warranty

Product	Model	Pallet Qty
SpaEase 175	LFSE175	44

SpaEase™ 200

Built to the Highest Quality Standards & Offering More Features & Upgrades than Any Traditional Hot Tub Cover Lifter

BUILT TO LAST LONGER

All parts except the Swing Arms are constructed of aluminum to minimize rusting. The Swing Arm is made of steel to handle the weight of the cover when in the open position. To protect it we apply an electrolysis coating similar to what is used on bicycle and automotive parts.

ADDITIONAL PROTECTION

All hardware is stainless steel versus zinc used on traditional cover lifters.

THE IDEAL ROBE HOLDER

Our handle not only makes operating the lifter easy, but it is also uniquely positioned to be a convenient place to hang a long robe.

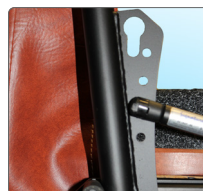

PROFESSIONAL LOOK

To hide the unsightly nuts and bolts of traditional lifters the SpaEase 200 includes an attractive and protective Cover Plate.

ADJUSTABLE TO ANY SIZE SPA

The SpaEase 200 offers multiple attachment points making it easy to operate no matter what size hot tub you own. Attachment points can easily be changed after installation.

- **Opens Your Cover at the Touch of a Button** from Inside Your Home!
- **Automatically Locks Your Cover** Preventing Unsupervised Usage & Enhancing Safety

SpaEase™ Access Rails

Guaranteed Not to Rust, Pit, or Discolor

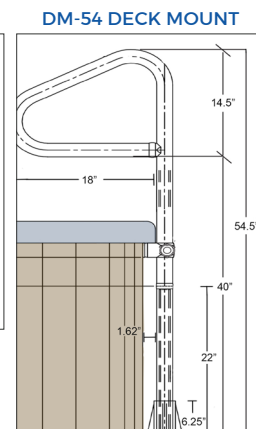

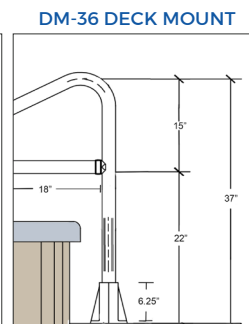

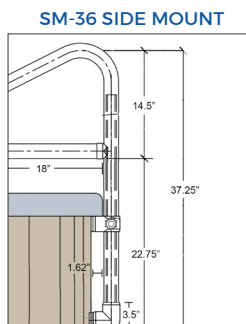

AVAILABLE COLORS

Black Onyx

Graphite Grey

LIFT - TURN - DROP & LOCK

Slightly lift the rail, swing it 180 degrees, and it locks in place providing both safety and convenience. Eliminates the need to reach out and below the spa to turn a screw found on most traditional rails.

Built to Last Forever

The Only Rails Guaranteed Not to Rust, Pit, or Scale No Matter What the Climate. And Guaranteed to Not Fade or Discolor & Still Look Brand New For Many Years.

Safest Access Rails

Our proprietary attachment brackets allow you to sell the safest access rails in the hot tub industry. Our Plastic Mounting Base eliminates the need for any Bonding Requirements.

This important accessory for many hot tub owners is the most difficult accessory for dealers to market and display. Reason: Quality Access Rails require attachment to the spa cabinet, which can diminish the value of a showroom hot tub.

CONVERTALIFT®

PATENTED

Automatic Cover Lift System for Hot Tubs & Swim Spas

*Opens Your Cover at the
Touch of a Button
Up to 100' Away!*

Converts Spa Lifters Into Automated Systems

ConvertALift Includes these Unique Components along with Specialized Cables & Hardware:

Control Box

The Control Box is the brains to the system that is encased in a water-resistant plastic box that is designed to be installed within the cabinet of the spa.

Linear Actuators

Stainless Steel Actuators extend and retract to raise and lower the cover. Stainless-steel provides protection from all forms of weather.

Keyswitch

Spa-Side Control Keyswitch is used mainly to close the cover safely and lock it shut but can open the spa as well. Keyswitch assembly comes pre-wired

Remote Control

Remote for Hot Tubs

Remote for Swim Spas

Remote Control, everybody's favorite part allows you to open your spa from up to 100' away or from inside your home.

Benefits of The ConvertALift System

ADDS SAFETY

Automatically locks your cover helping to keep children safe and uninvited guests out. During usage it helps prevent unintended closure from wind without engaging a lock.

SAVES MONEY

Our Unique Patented VacuSeal System seals your cover to the spa helping to prevent heat loss commonly found on traditional covers.

CONVENIENCE

Our patented ConvertALift together with our patented VacuSeal System allows you to now open your cover, from in your home, at the touch of a button.

CANOPY OPTION

Our Canopy Arm provides protection from the sun, providing you the shade needed on those hot and sunny days.

Features

- Works in Extreme Weather
- Lifts Over 50 lbs. of Added Weight w/Ease
- Installs in 45 Minutes
- Automatically Stops for Obstacles
- 100% Warranty on All Parts
- Plugs into a 110V 15 Amp Outlet or Can be Wired Directly to Spa Pac

A Must-Have for Swim Spas

Open Both Sides at Once or One Side at a Time

A Few FAQs About The ConvertALift System

1. How does ConvertALift work?

ConvertALift is not a cover lifter. It converts select hot tub cover lifters into automated systems allowing the user to open and close the cover electronically.

2. Which Cover Lifters does ConvertALift work on?

ConvertALift can be used on either our SpaEase 200 or the VacuSeal 400 Cover Lifter.

The VacuSeal 400 requires a VacuSeal Cover but only with the VacuSeal System can you open the cover in one motion at a distance or from within the home. The SpaEase 200 Lifter works on most any traditional hot tub covers but still requires you to fold the cover in half on opening and closing.

3. How do you Power the System?

The Power Cord can be plugged into any standard US 110-volt 15-amp outlet, or a direct wire can be run to the home by an electrician. But most installations are done by a spa tech easily installing it to the spa pac.

4. Is ConvertALift Different for Hot Tubs vs Swim Spas?

ConvertALift is interchangeable. The only difference is the Remote Control.

5. Can I convert the SpaEase 200 into a VacuSeal System and later into ConvertALift?

The SpaEase 200 and the VacuSeal Lifter are interchangeable and use identical parts.

6. What cover radius will not work for the VacuSeal Cover?

A radius over 12" requires an Extension Bracket which allows up to 16" maximum.

7. Will ConvertALift work on a drop-in installed hot tub?

A minimum of 12" of vertical space is required from the top of cabinet on both sides.

8. What happens if I lose my Remote?

New Remotes can easily be sent, and programming is easy and takes less than 1 minute.

9. How long does it take for the cover to open?

Approximately 19 seconds.

10. Will it handle heavy snow loads?

The system has been tested to operate with over 50lbs. added to the cover.

11. How will the cable connection attachments handle outdoor environments?

They're rated to handle virtually any weather climates of snow and rain in temperatures of minus 4 degrees Fahrenheit.

12. How do the Actuators hold up to spas located near saltwater environments?

The Actuators are made of Stainless Steel and have been used in marine conditions.

13. How long does it take to install?

First time installer should plan for 2 to 3 hours for hot tub. Second time 2 hours and once an installer has done a couple it should only take about 1.5 hours. Double these times for a Swim Spa.

14. Are all component parts easily replaceable?

The system was designed so that any part could be replaced by a homeowner in less than 15 minutes.

15. How Does a Service Tech have access when customer is not home, and key is out?

The Key is universal to all our systems, and a tech can program their remote to customer's spa in less than a minute without affecting customer's spa.

16. Is ConvertALift available on Amazon or Mass Merchants?

NO, it is strictly sold through registered hot tub retailers.

A more detailed FAQ is available upon request.

VacuSeal cover & Lifter For Hot Tubs

With & Without ConvertALift System

Easiest to Use

ONLY Cover Requiring Just One Simple Motion to Open or Close

ONLY Lifter that Assists in Both Lifting and Lowering Your Cover

Saves You Money

Our Patented Bottom Hinge Seals the Cover to Your Spa to Prevent Heat Loss. Other Covers Need a Center Gasket which is where Heat is Lost, Costing You \$\$\$.

The VacuSeal Applies a Gentle Downward Pressure When Closed, Enhancing the Seal. Our "Rear Support Bar" always returns Cover to it's original position so you never have to shift Cover after it's been closed.

Converts Into a Canopy

Protection from the Sun, an Escape from the Rain, and a Little More Privacy.

Enhanced View During Usage

Only Cover where you face the attractive exterior side.

Within months chemical fumes discolor the underside.

LIFT HANDLE/ROBE HOLDER

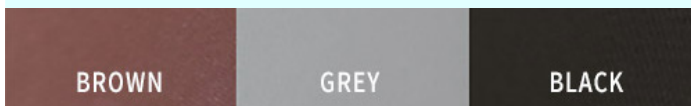

ADJUSTABLE SWING ARM

ONLY Lifter that Allows Adjustment for Your Spa Size.

Upgrade to WeatherProof

WeatherProof is a polyester fabric with a urethane coating making it both attractive and weather resistant. It minimizes shrinkage, features a high UV protection, and has excellent tear resistance. It's easy to maintain and can be cleaned with soap and water, eliminating the need to apply a conditioner every few months as required on vinyl.

Best of All,

3x Stronger - Extending the Life of Your Cover
25% Lighter - Makes Opening & Closing Easier

SPECIFICATIONS:

Fits Spas up to 96" x 96"

- Up to 96" x 108" w/Extended Bar

Fits Cover Radius up to 12"

- Up to 16" w/Extension Bracket

Requires 2" Clearance on the Sides

- 7" on the Side w/Handle

Requires 7" to 9" Rear Clearance

WARRANTY:

5 Years | VacuSeal Lifter

3 Years | VacuSeal Cover

2 Years | ConvertALift

CONVERTALIFT®

VacuSeal Easily Converts into a Remote Controlled Cover Lifter System. See P.17

VacuSeal® For Swim Spas

One Person Can Easily Open & Close Both Covers in Seconds!

Bi-Fold Design

Bi-Fold Design includes 2 VacuSeal Covers & Lifter Systems

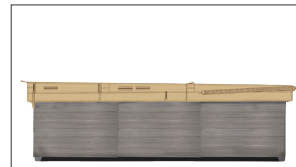

Unique Features

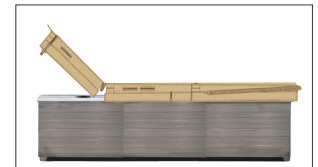

- Bottom Hinged Covers Seal in the Heat Reducing Your Electrical Bill
- Reverse Pneumatic Technology Lifters Assist in Both Opening & Closing of Covers
- Rear Support Bars Eliminate Shifting on Closure
- Patented Internal Opening Design provides an Enhanced View of Cover During Usage
- Dual Robe/Towel Holders on Each Side
- Adjustable Swing Arms Make Operating Easier by Allowing Adjustment to Your Spa Size

Tri-Fold Design

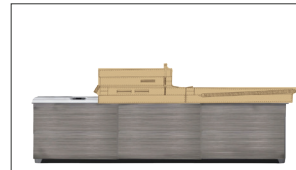

Ideal for Oversized Hot Tubs and Swim Spas over 16' Long

Fully Closed Position

Step 1: Lift First Section

Step 2: Snap Lock First Section to Center Section

Step 3: Lift All Sections w/ Lifter to Fully Open Position

FULL LENGTH INSULATION BARRIER

SAVES YOU MONEY & PREVENTS RAIN WATER FROM ENTERING YOUR SPA

The Combination of the Full-Length Insulation Barrier (that squeezes each side together), Our VacuSeal Hinge, and Our Rear Support Bar (guaranteeing cover to always return to the exact original position) provides the perfect closure for Your Swim Spa Cover!

Upgrade to WeatherProof

WeatherProof is a polyester fabric with a urethane coating making it both attractive and weather resistant. It minimizes shrinkage, features a high UV protection, and has excellent tear resistance.
